SPECIAL REQUIREMENTS:

Must possess a valid New State Drivers License Class A or B with tank and Air Brake Endorsements at the time of application and maintain such license for the duration of employment.

Must possess NYS Class 1 and 2 Inspectors license within one year of permanent appointment and maintain such license for duration of employment.

Must possess NYS Underground Storage Tank System Operators License Class A and B within one year of permanent appointment and maintain such license for duration of employment.

DISTINGUISHING FEATURES OF THE CLASS:

An incumbent in this position will be responsible for maintaining parts inventory and foreseeing special parts needed to fulfill the future needs of the Highway Department. The incumbent will also maintain the county bulk fuel system in accordance with state and federal standards. Considerable autonomy, independent and initiative are necessary to keep the parts room, fuel systems and shop running efficiently. The incumbent will be responsible for dealing directly with vendors to get the best possible prices. The incumbent will have to drive long distances out of the county in a timely manner to retrieve parts that are needed for emergency repairs. The incumbent uses county purchasing practices for quotes, bids and service contracts. An incumbent will also service and repair public works vehicles and equipment up to journey level mechanical duties as needed. The incumbent works with mechanics to retrieve technical information from online and paper service manuals. Incumbent also schedules outside vendors to repair building systems not related to the Facilities Department. The work is performed under general supervision of Senior Heavy Equipment Mechanic and Senior Crew Supervisor. Supervision of others is not a significant factor of this job. The employee will perform all related duties as required.

ESSENTIAL FUNCTIONS - PHYSICAL, MENTAL AND ENVIRONMENTAL:

Please note that these are illustrative only and do not attempt to address every type of physical, mental or environmental factor that may exist when performing the typical work activities outlined above.

Physical: The employee is routinely required to stand, walk, kneel, stoop, crouch, bend, reach and twist multiple times during an eight-hour, or occasionally longer, work day. He or she may assist others in pushing or pulling up to 700 pounds (with mechanical or human assistance), lift, carry and/or hoist overhead as much as 60 pounds. An individual in this role is required to have sufficient visual and auditory acuity to be able to perform acceptably and avoid risks and dangers to him or herself and co-workers. He or she is required to speak and communicate sufficiently to avoid risks and dangers to him or herself and co-workers. The employee must be able to firmly grasp tools, equipment and machinery parts. He or she is required to have fine motor skills and sufficient hand/eye coordination necessary to manipulate, computer keyboards and to repair and install large and small parts. Head, hands, arms, legs and feet must all work together in coordination in order to enable an individual to perform the essential functions of this job.

Environmental: He or she must be able to walk on slippery or uneven surfaces, have the ability to work alone, both inside and outside, and may be exposed to dust, dirt, grease, humidity, excessive heat (occasionally above 100°) and excessive cold (often below 32°). He or she must have the full physical ability to operate and drive all kinds of heavy and light equipment as well as trucks, most with a clutch and standard transmission configuration, some with many gear options.

Mental: The employee must possess a psychological makeup and the interpersonal skills necessary for him or her to work cooperatively with others.
