## **DISTINGUISHING FEATURES OF THE CLASS:**

This skilled technical work involves the development, coordination and management of various information technology activities. This position works with all town departments to provide coordination of the computer network system and management of the various information technology activities including data communications networks, cybersecurity, electronic communications, website, social media and voice communication systems including mobile devices. The work is performed in consultation with department heads to serve as a technical consultant assisting in the identification of appropriate software and technology to meet their needs. Work is performed in accordance with the policies of the Town Board, under the supervision of the Town Supervisor. There is considerable exercise of independent judgment and autonomy in carrying out details of the work with the sole responsibility for technical results. Supervision is exercised over a small staff and/or interns. Network Specialist will perform all related duties as assigned

## **TYPICAL WORK ACTIVITIES:**

- Manages, oversees and develops Town computer systems, data communications networks and related technology,
- Manages, oversees and supports organizational software including electronic mail, databases, document management, website, electronic surveillance, electronic access, etc.,
- Manages town servers to ensure adequate resources for all town information technology projects, appropriate access controls, and data security,
